

# International STUDENTS

## **Welcome International Students to MERC**

### **We have been expecting you**

We are looking forward to welcoming you to our beautiful campus. We understand that living and studying in another country will be a very exciting experience, but we also know that you may find elements of it challenging at times.

MERC with advanced equipments, expertise and trained personnel have a great potential for reception of many researchers and students for implementing independent and/or joint research projects as well as educating students. This caused formation of a close and continuous interaction between researchers, faculty members and students on one hand, and Universities, Institutes and important industrial agencies on the other hand. This close cooperation led to execution of many important pure and applied research projects in the fields of Advanced Materials and Renewable Energies which has effectively turned MERC into one of Iranian pivotal research Institutes.

As a new international student, you may have a lot of questions about the Institute and student life. The good news is, the International Office (IO) is here to help! The IO is your starting point and your ongoing support throughout your studies at MERC.

Please do not hesitate to contact us;

Address: International Office,  
Materials and Energy Research Center (MERC),  
Imam Khomeini Blvd, Meshkin-Dasht, Karaj, IRAN
